now do not misunderstand me america is great but we are fed up with being over

taxed and over regulated we are tired of being told how much salt to put on our food what kind of cars we can drive what kinds of guns we can own what kind of prayers we are allowed to say and where we can say them what we are allowed to do to elect political candidates what kind of energy we can use what doctor we can see what kind of nation are we becoming i fear it s the very kind the colonists fought against but perhaps most of all we are fed up because deep down we know how great america has always been how many great things the people do in spite of their government and how great the nation can be in the future if government will just get out of the way our fight is clear we must step up and retake the reins of our government from a washington establishment that has abused our trust we must empower states to fight for our beliefs elect only leaders who are on our team set out to remind our fellow americans why liberty is guaranteed in the constitution and take concrete steps to take back our country the american people have never sat idle when liberty s trumpet sounds the call to battle and today that battle is for the soul of america

brighten the season with tales from the master of christmastime fiction most famous in the realm of holiday literature for his 1843 publication a christmas carol charles dickens was in fact a prolific writer in the yuletide genre and a great contributor to many now prevalent traditions of the holiday itself in the year

following the release of a christmas carol dickens released the chimes a christmas story of some bells that rang an old year out and a new year in this story combined his usual sympathy for the poor with the notion that we must always strive to live in nobler ways in 1845 came the cricket on the hearth a novella that in its time surpassed even a christmas carol in popularity for stage productions the years 1846 and 1848 respectively saw published the battle of life and the haunted man and the ghost s bargain given this wealth of christmas themed works it is no wonder that dickens is sometime referred to as the man who invented christmas perfect for both fans of dickens work and those who just find special pleasure in the holiday spirit these five christmas stories are now available as part of the word cloud classics series providing a chic inexpensive introduction to timeless tales

despite poultry being lauded as a relatively affordable source of protein and micronutrients in many lower income countries chicken meat is twice as expensive in png compared to nearby southeast asian countries recent rural household consumption data collected by the international food policy research institute ifpri suggests that an important share of households do not eat enough protein to meet healthy dietary guidelines schmidt et al 2024 poultry along with fish and pork are the three most important animal source protein foods in the country yet these products remain financially prohibitive to a large share of the population this paper explores the unique challenges and opportunities within png s poultry sector using a growth diagnostic approach pioneered by rodrik 2010 through interviews with key stakeholders across the poultry value chain we found that while high feed costs persist as a significant challenge poultry farmers have yet to adopt additional cost reduction strategies such as establishing small scale regional feed mills utilizing local feed ingredients and diversifying feed and input imports an intriguing puzzle of png s poultry sector is the limited number of small scale producers successfully transitioning to medium scale operations this primarily stems from high transport costs and restricted access to input and sales markets the challenges of marketing chicken in png have received less attention than production drawing on the experiences of successful models in other countries and considering the specific situation of png s poultry sector fostering poultry production and processing clusters

e.g. in lae suburban areas emerges as a potential strategy to address production transportation and marketing constraints by concentrating production value chain clustering can enhance access to essential services e.g. slaughtering and cold storage improve market access and reduce overall costs while clustering holds promise for png's poultry value chain its success hinges upon joint action between the public and private sectors as well as ngos operating within the value chain
